PAPER

**Please find below and/or attached an Office communication concerning this application or proceeding.**

The time period for reply, if any, is set in the attached communication.

<b>Office Action Summary</b>	Application No. 09/578,672	Applicant(s) DONOVAN ET AL.	
	Examiner Adnan M. Mirza	Art Unit 2145	

**-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --**

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**Status**

- 1) ☒ Responsive to communication(s) filed on 28 February 2007.
- 2a) ☐ This action is **FINAL**.                      2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

**Disposition of Claims**

- 4) ☒ Claim(s) 1-31 is/are pending in the application.
- 4a) Of the above claim(s) \_\_\_\_\_ is/are withdrawn from consideration.
- 5) ☐ Claim(s) \_\_\_\_\_ is/are allowed.
- 6) ☒ Claim(s) 1-31 is/are rejected.
- 7) ☐ Claim(s) \_\_\_\_\_ is/are objected to.
- 8) ☐ Claim(s) \_\_\_\_\_ are subject to restriction and/or election requirement.

**Application Papers**

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on \_\_\_\_\_ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.  
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).  
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

**Priority under 35 U.S.C. § 119**

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All    b) ☐ Some \*    c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
  2. ☐ Certified copies of the priority documents have been received in Application No. \_\_\_\_\_.
  3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

\* See the attached detailed Office action for a list of the certified copies not received.

### **DETAILED ACTION**

In view of the Appeal Brief filed on 02/26/2006, PROSECUTION IS HEREBY REOPENED.

New action set forth below.

To avoid abandonment of the application, appellant must exercise one of the following two options:

(1) file a reply under 37 CFR 1.111 (if this Office action is non-final) or a reply under 37 CFR 1.113 (if this Office action is final); or,

(2) initiate a new appeal by filing a notice of appeal under 37 CFR 41.31 followed by an appeal brief under 37 CFR 41.37. The previously paid notice of appeal fee and appeal brief fee can be applied to the new appeal. If, however, the appeal fees set forth in 37 CFR 41.20 have been increased since they were previously paid, then appellant must pay the difference between the increased fees and the amount previously paid.

A Supervisory Patent Examiner (SPE) has approved of reopening prosecution by signing below:

\*\*\*

### ***Claim Rejections - 35 USC § 103***

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person

Art Unit: 2145

having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-31 rejected under 35 U.S.C. 103(a) as being unpatentable over Christensen (U.S. 6,330,605) and Sixtus (U.S. 5,903,721).

As per claims 1, 14 Christensen disclosed a method of processing a first request for web page, comprising: receiving the first request for the web page (col. 4, lines 60-67);

However Christensen did not go in details of transmitting, to a device from which the first request was received, at least one command to send a second request for the web page, and a first timestamp.

In the same field of endeavor Sixtus disclosed, "As a first function of the received user registration number, the received time stamp data, and the calculated user matrix; calculating an expected network protocol port number as a second function of the received user registration number, the received time stamp data and the calculated user matrix (col. 4, lines 1-6).

It would have been obvious to one having ordinary skill in the art at the time of the invention was made to have incorporated As a first function of the received user registration number, the received time stamp data, and the calculated user matrix; calculating an expected network protocol port number as a second function of the received user registration number, the received time stamp data and the calculated user matrix as taught by Sixtus in the method of Christensen to increase the availability of the services offered by the service provider and also alleviating time consuming activities.

3. As per claims 2,15 Christensen-Sixtus disclosed wherein the transmitting step is responsive to an existence of a second timestamp received with the request (Sixtus, col. 4, lines 1-7).

4. As per claim 3,16,28 Christensen-Sixtus disclosed comprising the additional steps of: identifying a third timestamp; and responsive to the second timestamp received with the request, processing the request for the web page responsive to the second timestamp and the third timestamp (Sixtus, col.5, lines 1-17).

5. As per claims 4,17 Christensen-Sixtus disclosed wherein the identifying the third timestamp step is responsive to a capacity of at least one selected from at least one server and a device coupled to the at least one server (Sixtus, col. 9, lines 23-33).

6. As per claims 5,18 Christensen-Sixtus disclosed incrementing at least one of a plurality of counters responsive to the first request (Sixtus, col. 3, lines 48-66).

7. As per claims 6,19 Christensen-Sixtus wherein each of the plurality of counters corresponds to a range of time different from the other plurality of counters (Sixtus, col. 8, lines 57-66).

Art Unit: 2145

8. As per claims 7,20 Christensen-Sixtus disclosed wherein the identifying the third timestamp step is additionally responsive to at least one of the plurality of counters (Sixtus, col. 9, lines 23-33).

9. As per claims 8,21 Christensen-Sixtus disclosed comprising the additional steps of receiving a notification of abandonment of at least one selected from the first request and the second request; and decrementing at least one of the plurality of counters (Christensen, col. 9, lines 39-56).

10. As per claims 9,10,22,23 Christensen-Sixtus disclosed wherein the identifying the third timestamp step comprises sending a command to at least one selected from at least one server and a device coupled to the at least one server (Sixtus, col. 9, lines 23-33).

11. As per claims 11,24 Christensen-Sixtus disclosed wherein the transmitting step is responsive to a type of the first request (Christensen, col. 4, lines 60-67).

12. As per claims 12,25,30 Christensen-Sixtus additionally comprising transmitting computer readable program code devices configured to cause a computer to send the second request responsive to the indicator transmitted (Christensen, col. 5, lines 36-43).

13. As per claims 13,26,31 Christensen-Sixtus disclosed wherein the computer readable program code devices configured to cause the computer to send the second request responsive to

Art Unit: 2145

the indicator transmitted comprise at least one selected from a Java script and a Java applet (Christensen, col. 4, lines 27-39).

14. As per claim 27 Christensen-Sixtus disclosed a user request router having an input coupled to an apparatus input operatively coupled for receiving the first request (Christensen, col. 4, lines 60-67), the user request router for providing at an output a signal responsive to the first request received at the user request router input (Sixtus, col. 9, lines 23-33); and a cookie/applet generator having an input coupled to the user request router output for receiving the signal, the cookie/applet generator for providing a first output coupled to an apparatus output a first indicator of at least one time to send a second request for the web page (Christensen, col. 4, lines 43-56).

15. As per claim 29 Christensen-Sixtus disclosed wherein the cookie/applet generator provides at a second output a third indicator of time corresponding to the first indicator of time, the apparatus additionally comprising: a stroke count storage for having an input coupled to the cookie/applet generator third output for receiving the third indicator of time (Christensen, col. 6, lines 3-14), the stroke count storage for storing the third indicator of time and a set of fourth indicators of time and for providing the third indicator of time and the set of fourth indicators of time at an input/output; and a cutoff timestamp calculator having an input operatively coupled for receiving an indicator of capacity (Christensen, col. 4, lines 1-14), the cutoff timestamp calculator for selecting and providing at an output a timestamp from the set of fourth indicators of time responsive to the capacity; and wherein the user request router additionally comprises a

Art Unit: 2145

cutoff timestamp input coupled to the cutoff timestamp calculator output and the user request router provides the signal additionally responsive to the timestamp received at the cutoff timestamp input (Christensen, col. 9, lines 39-67).

### ***Response to Arguments***

Applicant's arguments with respect to claim 1-31 have been considered but are moot in view of the new ground(s) of rejection.

### ***Conclusion***

16. Any inquiry concerning this communication or earlier communication from the examiner should be directed to Adnan Mirza whose telephone number is (571)-272-3885.

17. The examiner can normally be reached on Monday to Friday during normal business hours. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Jason Cardone can be reached on (571)-272-3933. The fax for this group is (703)-746-7239. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
